

Hi I'm Guy Cook this is The Guy R Cook Report episode that we should talk about slack. From time to time I something that's just on my mind you don't meet and today it's slack and if you're not sure what slack is we've got a link in the show notes if you go to The Guy R Cook Report dot podbean dot com look for the

link that says free vdomainhosting inc slack invitation for you to use and bazinga you'll be there. I gots thinking about slack based on the number of big companies like Electronic Arts Salesforce Google Pinterest etc that use slack and I thought well that was the seed for the idea we need to create a team using slack as the interface and so I've begun that and I thought what better way to make the team people like you their listeners than to have a link there for the next 30 days it's going to be a free link to get a look at being a member of a slack so if you're on the fence if you're kind of saying well I don't know gee let's see well there's an article I got from TechRepublic it's linked in the show notes and it it's the slack smart person to guide and so if you want to have a look at the article that's got a pretty good set smattering of what's good about slack what's not good about slack and so forth it's a good explanation of why you might want to consider adopting a cloud-based collaboration tool ok thanks for listening to this episode of The Guy R Cook Report.

It's a wrap
